Let's Start!

Pronunciation Spot: Let's take a tour of the stars!

Learning Outcome

Understand detailed descriptions of real or imaginary events and experiences in the present, past or future, in spoken interactions or written texts.

Ask your partner:

- What did you learn about stars in school?
- Why are we so fascinated by stars?

Can Do Statements

- I can talk about science and leisure time.
- I can say and use words like *appreciate* and *associate*.
- I can say or use words that are spelled the same but are pronounced differently and/or have a different meaning.

Let's Explore!

Let's learn about the stars and **celestial*** poles!

* "Celestial" means of the sky or heavens.

Instructions: Read the text aloud.

A Guided Tour of the Stars

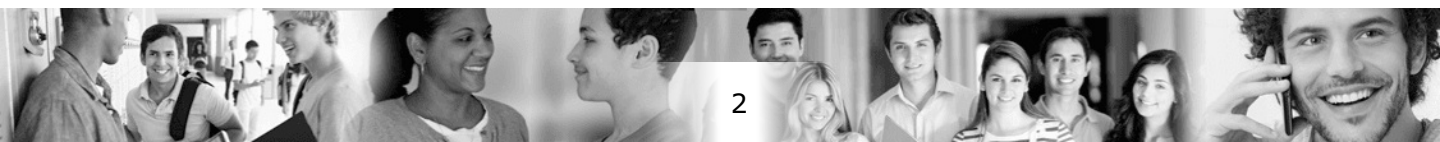

Hello everybody! Welcome to the annual stargazing tour! Before we start our tour I must tell you that I will stamp your parking permits at the end of the tour. Also the authorities do not permit eating or drinking while on the premises.

I really appreciate that everyone made it out today. I'll be your guide for this evening. We're going to locate as many stars and constellations as we can. In a minute, I will hand out sets of binoculars that can help you see what is minute to the naked eye. We are going to start with the first star whose brightness dominates the rest. When you rest your eyes on this star, you'll know that you have found the North Star also known as "Polaris".

They say it is the closest star to the celestial poles, which lie to the North and South. Travelers and sailors often associate this star with the North Pole, serving as a strong reference point as they navigate from one place to another. If you ever become lost at sea, this star can definitely point you in the right direction. You may also see that Polaris is part of a visible pattern of stars that congregate to form a constellation. The constellation you see here is called "Ursa Minor", which is also known as the "Little Dipper".

If you see a constellation of stars resembling a small ladle, you will know you have found the "Little Dipper" ... If you have problems finding Polaris, look for this constellation and you will find Polaris right on its handle. It's much easier to locate stars when you don't isolate or separate them.

Let's move on to the next star ...

Let's Practice!

Wait! The tour guide is using the same words differently!

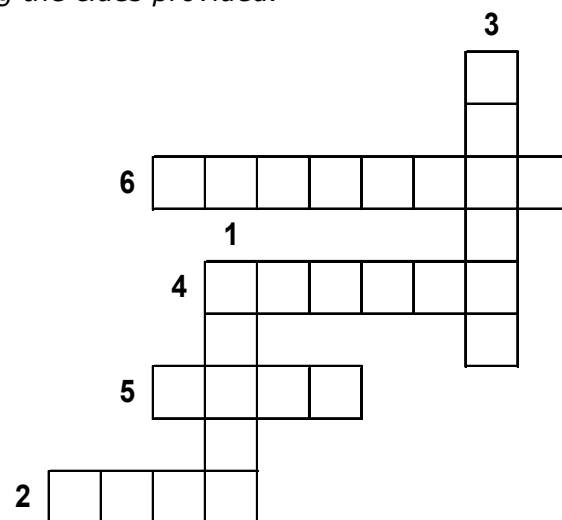

Instructions: Complete the crossword by reading the clues provided.

Down

1. This word is both a noun to refer to a particular place or spot, and a verb that means to aim or direct at something.
3. This word is both a noun that indicates 60 seconds, and an adjective that means something is very small.

Across

2. This word is both a noun to refer to a part that remains, and a verb that means to stop moving.
4. This word is both a verb that means to allow to do something, and a noun to refer to an official permission.
5. This word is both a verb that means to reside or to exist and an adjective that refers to a person or animal that is alive.

6. This word is both an adjective that means something happens regularly or habitually and a verb that means to visit or go to a place often.

Let's Practice!

Do you sometimes stop to appreciate the beauty of the stars at night?

Instructions: Proofread the sentences. Circle the incorrect word. Write the correct word below the incorrect one. Read the following sentences aloud. Check your pronunciation with your instructor.

1. I really appreciating the fact that everyone made it out today.
2. We are going to starting with the first star whose brightness dominates the rest.
3. Travelers and sail often associate this star with the North Pole.
4. They navigate for one place to another.
5. Polaris is part of a visible pattern of stars that congregating to form a constellation.

Extension Activity

Find more homographs and write a poem.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Go online or to your local library and find a list of 10 homographs.
- Check their definitions in a dictionary and find out whether they are verbs, adjectives, nouns, adverbs, etc.
- Check their pronunciation in the dictionary or with your instructor.
- Write a poem about the stars or a topic you like. Use at least 3 pairs of homographs in the poem.
- Practice reading the poem aloud.

Self-Assessment

Yes

No

I research words that are spelled the same but have different meaning and/or pronunciation.

☐ ☐

I write a poem using words that are spelled the same but have different meaning and/or pronunciation.

☐ ☐

I read the poem aloud.

☐ ☐

Target Words

- **to permit** (verb): to allow
e.g. Also the authorities do not permit eating or drinking while on the premises.
- **minute** (adjective): very small
e.g. Binoculars that can help you see what is minute to the naked eye.
- **to congregate** (verb): to gather together
e.g. A visible pattern of stars congregates to form a constellation.
- **to associate** (verb): to have contact with or connection to
e.g. Travelers and sailors often associate this star with the North Pole.
- **to isolate** (verb): to separate from
e.g. It's much easier to locate stars when you don't isolate or separate them.

Learning Points

Stressing Two Syllables Back From the Suffix: **-ate**

When you learn new words, it is important that you know which part of the word to stress. In words with the suffix **-ate**, the stress falls two syllables back from the **-ate** ending.

Suffixes, or word endings, can help you to decide where to place the stress in the word. Placing stress on the correct syllables will help others to better understand you when speaking.

For words with the suffix **-ate**, you should count two syllables back from the ending of the word and place the stress on that syllable.

operate	o - per - ate
populate	po - pu - late
contaminate	con - ta - mi - nate
discriminate	dis - cri - mi - nate
navigate	nav - i - gate
approximate	ap- prox -i-mate

You can use this rule for any word ending in **-ate**, even if the word is a long word.

Examples:

- *appreciate*
- *locate*
- *dominates*
- *associate*

Learning Points

Using Homographs

Homographs are words that sometimes sound the same and are spelled the same.

Some homographs sound the same even when they have different parts of speech as well as different meaning.

For example

rest (noun – the part that remains)

and

rest (verb – to relax)

Some homographs are pronounced slightly different because the stress falls on the first syllable if it is a noun and it falls on the second syllable if it is a verb.

For example:

permit (noun – a document that allows you to do something)

and

permit (verb – to allow someone to do something)

Some homographs are pronounced very differently.

For example:

minute (noun – 60 seconds of time)

and

minute (adjective – very small)

live (verb – to be alive; to reside)

and

live (adjective – living; happening in a concert venue in real time, not recorded)
