Let's Start!

Let's watch a sci-fi movie together!

Learning Outcome

Understand detailed descriptions of real or imaginary events and experiences in present, past or future, in spoken interactions or written texts.

Ask your partner:

- Have you ever watched a sci-fi movie that taught you about space? If so, what did it teach you?
- What do you know about our galaxy?

Can Do Statements

- I can talk about science and leisure time.
- I can express complex statements using words like *who*, *that* or *which*.
- I can express strong disapproval or refusal using *if*.

Let's Explore!

The movie **surpasses*** John's expectations.

* "*To surpass*" means to go beyond.

Instructions: Read the text aloud.

Peter: Wow! That was one amazing movie! John, did you enjoy it?

John: I won't lie, it did surpass my expectations. However, there were some crazy scenes, which were confusing.

Peter: Which parts?

John: There were was some talk about nebulas and galaxies, which I still can't quite understand.

Peter: Good question! Galaxies are much larger in size compared to a nebula.

John: Oh okay. That makes sense, but wait ... The main character talked about how he passed by a nebula that was lying inside a galaxy.

Peter: Yes. A nebula can be found inside a galaxy. The same can't be said about galaxies being inside a nebula, which I explained is smaller.

John: This is interesting stuff. I'd love to learn more about galaxies. Peter, I'll make a deal with you. If you'll teach me astronomy, I'll let you off the hook on your proposition.

Peter: Okay deal. I'll have to check my schedule, which looks very busy this month.

John: Well that's too bad. If you won't do it this month, the deal is off.

Peter: Why are you so bent on having it this month?

John: I have to keep my interest high. If you won't find some time for me next month, you can forget about it altogether.

Peter: Fine. I'll give you an hour a week, which is still asking a lot.

John: I don't know if one hour is enough to be honest. If you'll do it for two hours a week, you can expect me to pay for your next movie.

Peter: Sounds very enticing! How about if I come to your house once a week for two hours, will that be okay for you?

John: Fine. Thanks.

Let's Practice!

John might have been confused because of some words in the movie.

Instructions: Match the words on the left with their definitions on the right.

COLUMN A

1. nebula
2. galaxy
3. make a deal
4. off the hook
5. bent on
6. enticing

COLUMN B

- a. expression that means you are determined or resolved.
- b. to agree with somebody on a particular subject.
- c. a very large cloud of dust and gas that exists in outer space.
- d. an adjective that indicates something is so attractive that you want to do it or have it.
- e. an extremely large group of stars and planets.
- f. expression that means free from obligation.

Let's Practice!

Peter accepts John's deal, and now he'll be his astronomy mentor.

Instructions: Write the sentences in the correct order. Read the sentences aloud. Check your pronunciation with your instructor.

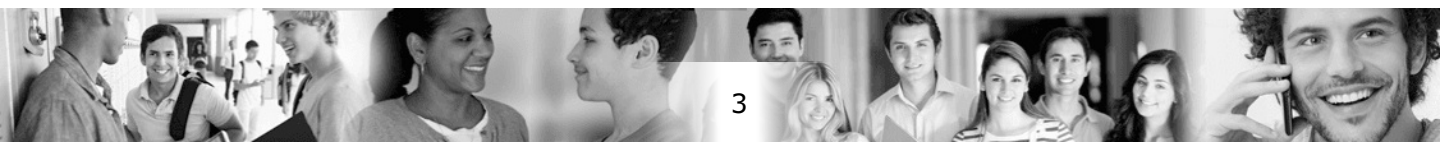

1. for / . / were / some / However / which / were / there / confusing / me / parts

2. that / passes / The / main / talked / about / inside / character / nebula / how / by / was lying / a / a / galaxy. / he

3. which / a / . / be / nebula / is / can't / smaller / about / The / inside / galaxies / said / same / being / explained / I

4. schedule / month. / very / have / which / to / my / looks / I'll / this / check / busy

5. asking / lot / hour / I'll / a / an / a / week / is / which / give / . / you / still

Extension Activity

Find out about a galaxy!

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Go online or to your local library and find information about a galaxy such as The Milky Way or Pinwheel Galaxy.
- Find out at least 8 facts about the galaxy and take notes about it.
- Share your information with a group of students and discuss what will or won't happen if the galaxy survives or not in the future.

Self-Assessment

Yes	No
☐	☐
☐	☐
☐	☐

I read about a galaxy.

I gather and write down facts about the galaxy.

I present my findings to a group.

Target Words

- **off the hook** (expression): no longer responsible for something
e.g. I'll let you off the hook on your proposition.
- **bent on** (expression): to be firm of purpose and belief; determined
e.g. Why are you so bent on having it this month?
- **galaxy** (noun): one of the independent groups of stars in the universe
e.g. He passed by a nebula that was lying inside a galaxy.
- **make a deal** (noun): to compromise or reach an agreement
e.g. Peter, I'll make a deal with you.
- **to entice** (verb): to persuade someone to do something by offering them something pleasant
e.g. Sounds very enticing!

Learning Points

Non-Defining Relative Clauses

You use a *non-defining relative clause* when you want to add extra information to the noun you are talking about. You need to separate the main clause from the relative clause with commas.

You can create a non-defining relative clause if the relative clause gives more information about a proper noun or a noun that is known. A non-defining relative clause adds non-essential information about the noun.

who or **whom** (subject or object) = refers to people

which (you cannot use **that**) = refers to things

whose = shows possession for both people and things

Examples:

The relative clause can come after the subject of the sentence.

*Barack Obama, **who is the president of the United States**, always makes wonderful speeches.*

*The Bahamas, **which is made up of several tiny islands**, is a popular tourist destination.*

The relative clause can come after the object of the sentence.

*Last week I met Barack Obama, **who is the president of the United States**.*

*I just came back from the Bahamas, **which is made up of several tiny islands**.*

Notice the difference in meaning between defining and non-defining relative clauses:

*A teacher took her students to the beach. The students, **who wanted to go swimming**, ran into the water.*

(This means all of the students ran into the water. This is extra information about the students.)

*A teacher took her students to the beach. The students **who wanted to go swimming** ran into the water. The other students had a picnic in the shade.*

(This means that some of the students wanted to go swimming. The relative clause is necessary to define or say which students ran into the water.)

In speaking, remember to pause when you see the commas.

Examples:

- *The same can't be said about galaxies being inside a nebula, **which** I explained is smaller.*
- *I'll have to check my schedule, **which** looks very busy this month.*

Learning Points

Will and Won't in the If-Clause to Express Refusal or Strong Disapproval

If you want to show refusal or disapproval, you can use *will* and *won't* in the if-clause of your sentence.

Will can be used to express insistence when you use it with **if**. Insisting means that someone is demanding that something happen.

For example:

If you *will* smoke two packs of cigarettes a day, it's no wonder you have respiratory problems.

Won't can be used to politely express refusal when you use it with **if**. When you refuse to do something, it means that you don't want to do it. You are saying "no" to doing something.

For example:

If you *won't* pick me up later, I'll get a ride with my mother.

In speaking, you need to place more emphasis and stress on the word **won't**.

Examples:

- **If you *won't* do it this month, the deal is off.**
